

Cretaceous Dinosaurs

Near the beginning of the Cretaceous, around 120 million years ago, new groups of dinosaurs originated, including: ceratopsians (plant-eating dinosaurs with horns on the head, such as *Triceratops*), pachycephalosaurs (smaller dome-headed, plant-eating dinosaurs), and hadrosaurs ('duck-billed' dinosaurs such as *Edmontosaurus*).

A fight between Stegosaurus and Ceratosaurus

Older groups included albertosaurids, nodosaurs, and ornithomimids. Also, *Tyrannosaurus rex* and *Triceratops prorsus*.
